EDUCATION

Stony Brook University

Stony Brook, NY

B.S. in Computer Science,

Expected Graduation: May 2029

Relevant Courses: Big Data & Warehousing, Data Structures, Applied Linear Algebra, Discrete Mathematics, Systems Programming, IT and Infrastructure, Calculus I & II

WORK EXPERIENCE

NYC Department of Citywide Administrative Services - Fleet Division, Manhattan, NY

June 2026 - August 2026

Data Analysis & Systems Administration Intern

- Analyzed 100,000+ maintenance and utilization records across a 30,000-vehicle municipal fleet to identify cost and downtime drivers, producing recommendations adopted by the Fleet Systems team.
- Built pivot table models summarizing utilization and maintenance spend by the different divisions of government, giving managers a repeatable view that replaced one-off manual data pulls.
- Authored SQL queries in AssetWorks to extract operational datasets supporting weekly fleet reporting for the Fleet Systems team.
- Administered internal fleet tooling and validated data accuracy across 10,000+ records, supporting reliability of division reporting.

JP Morgan Chase & Co, Jersey City, NJ

July 2025 - August 2025

Data Engineering Intern

- Built a Python tool automating SQL query generation from 10,000+ row Excel datasets, reducing a recurring manual process from ~2 hours to ~2 minutes per run.
- Validated data integrity across 4+ internal datasets, surfacing discrepancies that informed pipeline design decisions.
- Designed ETL workflows loading data into internal databases, standardizing how datasets were cleaned before analysis.
- Presented automation results and pipeline findings to 10+ senior engineers, translating technical work into business impact.

Stony Brook Campus Residences Department of IT, Stony Brook, NY

September 2025 - Current

Technical Analyst

- Partnered with university IT staff to scope requirements for 4+ internal applications, translating non-technical departmental workflows into technical specifications.
- Built and maintained internal web applications used by 100+ staff to track all devices across the 60+ residence halls, replacing manual spreadsheet processes.
- Engineered RESTful API endpoints enabling real-time retrieval of university resource data across internal applications.
- Provided technical support and system deployment across campus, supporting 200+ devices.

NYC Department of Education - Division of Instructional & Information Technology

April 2024 - May 2024

Research Collaborator

- Partnered with NYC DOE's Division of Instructional and Information Technology to architect a scalable student record-keeping solution, scoping requirements across the nation's largest school district serving 1M+ students.
- Researched and proposed data organization frameworks to modernize student record accessibility, improving retrieval efficiency and security compliance across district systems.
- Presented system architecture and research findings directly to department stakeholders, delivering a structured roadmap for infrastructure modernization adoptable at the district level.

EXTRACURRICULARS

Chinatown Youth Initiatives - Program Facilitator, New York, NY | Summer 2026

- Designed and delivered curriculum for a youth leadership program, including AAPI history sessions, panel facilitation, and a co-led neighborhood walking tour.
- Guided student teams through a structured problem analysis on small business displacement in Chinatown, coaching them from research through final strategy recommendations.
- Coordinated panel programming with community leaders from Welcome to Chinatown, CLP, and CYI, managing scheduling and session content.

Himalayan Student Association, Fundraising Representative | Stony Brook, NY

- Led fundraising for a 40-member cultural organization, raising \$1,000+ across initiatives to fund campus events.
- Managed event budgets and vendor coordination for cultural events with 100+ attendees.

SKILLS

Languages: Python, SQL, Java, HTML, CSS, JavaScript
Databases: PostgreSQL, MySQL, MongoDB

Frameworks/Libraries: React, Pandas, Express, Node
Tools: Excel, Pivot Tables, VLOOKUP, Power BI, Tableau, Google Sheets, Jira
